CALL FOR ABSTRACTS

WELCOME NOTE

Dear ladies and gentlemen,
dear colleagues,

We herewith cordially invite you to the 14th Congress of the European Headache Federation in Berlin.

New and exciting times are dawning, with a slew of new therapies underway: CGRP antibodies for migraine prophylaxis, lasmiditan as an alternative to triptans for acute therapy, atogepant, ubrogepant, possibly PACAP antibodies and more. That is why we chose “Head over Ache: Silver Lining Novel Treatments” for the motto of the 14th European Headache Federation Congress.

Now we, physicians, psychologists, cost bearers, politicians, and those working in health care, must make sure that the new as well as the old treatments reach the right patients in the optimal way. We therefore invite doctors and scientists from Europe and abroad, but also our partners DMKG, DGS, EFIC, EMA, IHS and LTB to take part in this event.

We warmly welcome you to the Maritim Hotel from July 3–5, 2020 in wonderful Berlin, which is always worth a visit, especially at the beginning of summer! Together, let’s explore the future of headache treatment here in the capital of Germany. We remain in anticipation of interesting contributions and a profitable discussion,

Yours sincerely,

Zaza Katsarava & Richard B. Lipton
Congress chair & congress co-chair EHF 2020

- Prognostic biomarkers and individualized treatment | Identifying natural subgroups of people with migraine: Approaches to personalized medicine
Review on the evidence that symptom profiles, comorbidity, triggers, treatment response, genetics, biomarkers and imaging can be used to identify natural subgroups of people with migraine and that those subgroups are useful in individualizing treatment and improving outcomes
- New targets | Emphasizes the generation of mechanisms that will lead to the next generation of treatment
- Regulatory and reimbursement science in headache medicine | EMA, FDA, NICE perspectives; Role of MBS as an acute treatment outcome
- Latest and greatest headache science | Role of glymphatic system in migraine, mechanisms of individual symptoms such as nausea, photo, phono, etc.
- “Headache day” for general practitioners and doctors’ assistants in cooperation with DMKG and DGS
- Young scientific talents | EHF – School of Advanced Studies presents its work

ABSTRACT SUBMISSION & TRAVEL GRANTS

The European Headache Federation invites scientists and clinicians for scientific exchange. We do our best to provide more room for the best science. We especially encourage young scientists to submit their best work. All posters will be evaluated by the scientific committee and the best posters will be presented at plenary sessions. The authors will receive free access to the congress and grants for travel and accommodation.
